PROFESSIONAL PROFILE

Second-year Cyber Security undergraduate with a strong interest in securing digital systems and understanding modern cyber threats. Continuously developing practical skills through hands-on learning and exploring new technologies. I am a motivated team player with good communication skills, eager to contribute to real-world projects and gain industry experience.

PROJECTS

Database design assignment

[2025 August – November]

Implemented and designed a relational database for a web-based system using tools such as SQL server management studio and MySQL workbench.

Gained practical understanding of database structure and optimization.

Port Scanner Tool

[2025 - present]

Technologies and Tools: Python, VS Code, GitHub

Developed a basic port scanner to identify open ports on a target system, helping to understand network behavior and potential security vulnerabilities.

The project strengthened knowledge of networking concepts and practical cyber security techniques.

Password Strength Checker

[2025 – present]

Technologies and Tools: Python, VS Code, GitHub

Created a password strength checker to evaluate the security level of user passwords based on defined criteria such as length and character complexity.

EDUCATION

2024-2028	Undergraduate BSc in information technology specialization in cyber security
2021-2023	G.C.E A/L - Mahamaya girls' school
2019-2020	G.C.E O/L – Mahamaya girls' school

SKILLS

Technical Skills

python | Java | C | PHP | HTML | CSS | JavaScript | Socket Programming | Port Scanning | Networking & System Security Basics | Linux Fundamentals

Soft Skills

Leadership | Problem Solving | Teamwork and Communication | Analytical Skills

Certifications & Learning

Cisco Networking Academy – Cyber Security / Networking Certificate

[2025 - present]

Completed a foundational course covering key concepts in networking and cyber security, including system protection, threat analysis, and safe practices.

Active Learner – Cisco Networking Academy

Continuously expanding knowledge in networking, cyber security fundamentals, and system security concepts through hands-on exercises and practical learning modules.

Active Learner – TryHackMe

Engaging with hands-on labs and practical exercises in networking, Linux, and cyber security to build real-world technical skills.
